Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 21 November 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3, 4, and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Igarashi (USPN 4523759).

Regarding claims 1 and 4, Igarashi discloses a golf club head comprising a hollow body with a heel 16, toe 18, top 22, bottom 20, strike plate 24, and rear portion wherein a recess 28 is defined within the body and a strip 56 integrated into the body covering the recess, a tab 44 formed at the rear portion of the body, an inlet 64 in communication with the recess, a vibration absorbing material 70 injected into the recess through the inlet and a sealing element which is defined as elements 56 and 72 engaged in the inlet to close the recess. It is not seen why the recess should be in the bottom or the rear portion in order to attain the invention. Applicant clearly submits that the recess may be defined at the heel, toe, top, or any appropriate portion of the club head. Evidence is submitted on Page 4, lines 8 through 11, of the instant application. Therefore, one having ordinary skill in the art would have found it obvious to place the vibration absorbing material in a recess form anywhere on the club head body so long as the feel of impacting a golf ball with the club head is improved.

Regarding claims 3 and 6, Igarashi discloses the sealing element having a longitudinal passage 64 there through (See Figure 2).

Allowable Subject Matter

Claims 2 and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alvin A. Hunter whose telephone number is (571) 272-4411. The examiner can normally be reached on Monday through Friday from 7:30AM to 4:00PM Eastern Time.
